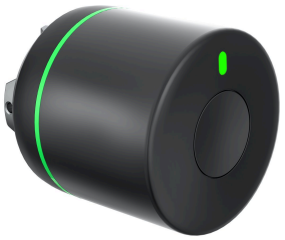
Janus Retrofit

Motorised turner for the lock you already have

Fits on the inside of the door, over the key or the thumb turn of your current cylinder, and turns it with a motor. The outside stays as it is: same lock, same cylinder, same mechanical key.



FEATURES

Opens with the app
From the JANUS app over Bluetooth, for users with a valid e-key: permanent, timed, one-time or recurring.

Remote access
Operators open the door remotely through the gateway.

Button or by hand
From the inside, with the button on the panel or by turning the panel by hand.

Auto-lock
Locks again after an adjustable delay. Passage mode keeps the door unlocked.

Opening log
Up to 500 records, kept for six months.

Mechanical key
From the outside, the door still opens with its own key.

TECHNICAL DATA

Locks	European mortise locks, 72 and 85 series, and Nordic lock bodies
